HILL FLORAL PRODUCTS CO.

Richmond, Indiana

SUNKIST. (E. G. Hill Co.)

A beautiful rich orange-copper sport of Joanna Hill.
Sunkist needs no further recommendation.

SENIOR. (Spanbauer)

This wonderful new red Rose was granted Plant Patent No. 2 on October 13, 1931. It promises to replace all the red varieties now grown under glass.

Descriptions and Prices

SENIOR (Spanbauer)

THIS Rose is the result of many years of painstaking breeding work carried on by Frank Spanbauer, one of the best-known Rose-growers in this country. It is a seedling of Richmond and General Jacqueminot. Filing his application for a patent under the new Plant Patent Law on July 1, 1930, Mr. Spanbauer was granted Patent No. 2 on October 13, 1931.

The buds are well formed and the color, which is predominantly crimson, is retained until the flower is fully developed. It has abundant foliage and is vigorous in habit of growth, producing extra-long stems without pinching. We have given Senior the severest tests under all conditions and find it the best year-around red Rose we have ever grown.

* According to our agreement with the originator, no plants sold are to be used for propagating purposes, either for own use or for sale.

PRICES:
Grafted Plants

{ \$40 per 100

320 per 1000 in lots of 7500
300 per 1000 in lots of 10,000

SUNKIST (E. G. Hill Co.)

This new Rose is a sport of the popular variety, Joanna Hill. Its rich orange-copper coloring is responsible for its name, which is being used with the permission of the California Fruit Growers Exchange.

The buds are long, well pointed, and slightly larger in size than the parent, with a few more petals. In habit and growth it is identical with Joanna Hill, which is one of the best recommendations that can be given to any Rose grown commercially.

This Rose is not patented and there are no restrictions as to propagation
